Hello, everyone in Rack-Land,

this week there is only the newspaper version, because I had a sudden hearing loss and therefore cannot hear properly. I've always seen myself as a visual person because I like to read and watch movies, but when you suddenly don't hear anything anymore, you realize how it isolates you. Or of course also isolates himself, because it is already very unpleasant to have other people around and not to know what they are saying. And as a musician suddenly nothing works anymore. You probably have to be a genius like Beethoven to be able to compose. And the synthesizer isn't just about notes, it's about the sound and you have to be able to hear. So I'm sorry, but there's no other way right now.

And now for the news.
