

NEWS of the RACK VCV

key events • new modules • developer news • module videos • contests • and more

Hello everyone in Rack Land,

You do not even believe how I love our big family. Right now I am terribly annoyed by the discussions in another forum on another topic. Although it's just a hobby, there is a lot of fighting and romping on trifles. I can only think of one word as a kindergarten. How pleasant it is in our community. It is rationally argued on a factual level and solutions are found together. For example, in the reorganization of the plugin manager, which now offers not only the previous order but also the short-term changed and further options. Thanks Andrew! And so it is with the Very Cool Patch Contest. The questions of low resonance and the schedule certainly lead to a constructive solution. And then they ask in the other forum why I don't get involved there anymore!

And now to the news.

Developer News

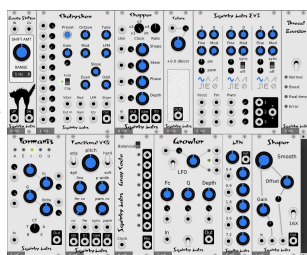

The **DrumKit** modules by Jerry Sievert have been revised and are now at version **0.6.4**.

<https://github.com/JerrySievert/DrumKit>

Squinky Labs has reworked its Harmonic VCO **Chebyshev** and **Shaper** with version **0.6.10**.

<https://github.com/squinkylabs/SquinkyVCV>

New modules

And also this week we welcome a new module developer in the Plugin Manager.

rcm goes straight to version **0.6.4** and with 7 modules. **GVerb** is a reverb that turns a mono into a stereo signal. **Audio 16** is a module with 16 audio inputs and outputs each and can be used as an alternative to the Core Audio module. The **other modules** produce **different control voltages**.

<https://github.com/Rcomian/rcm-modules>

According to the motto "you can never have enough blank modules" **spin/cf** delights us with **Hypno**, a rotating spiral with an optional overlay.

<https://github.com/cfoulc/spin>

New in the **Vult Compacts** range is the Bass Drum Module **Knock**, which combines various elements from other Vult modules.

Challenges

In **Week 18** of the **Very Cool Patch Contest**, the module to be used was **Tremolo Stereo FX** by **AS Modules**. Otherwise, as always, only freely available modules may be used. Posts can still be submitted until **midnight on Monday** and a new contest with another module will start on **Tuesday**. In the **17th week** the task was to use **only Noise Modules** as a sound generator and the winner was **Jon King**. Congratulations to the winner and many thanks to all participants and all the best for the next time.

Please also take part in the polls for the VCP.

VCV Rack - Día de los Muertos Vult Giveaway Contest

The **winners** have been chosen: The Vult Premium and Compacts package has just won **poxbox23**. The visualization in the Vult Blank module **Charles Kentis** and **Pete Johnson**, who both got equal votes.

Again congratulations to the winners and many thanks to all participants.

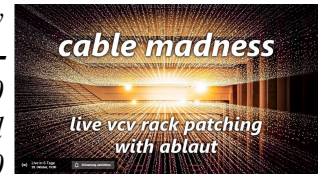

Videos

ablaut:

*Every Sunday a new live stream called **Cable Madness**. (13:00 UTC, 15:00 Central European, 21:00 Shanghai, 9:00 New York)*

You can find the last video under the following link.
