

NEWS of the RACK VCV

key events • new modules • developer news • module videos • contests • and more

Hello, everyone in Rack-Land,

Sunday afternoon, the sun shines, the bistro under my apartment puts out the chairs and everyone enjoys the beautiful weather. Let them, I prefer to devote myself to my favorite pastime - VCV rack. But at least I'm sitting here barefoot and in shorts and the window's open. The best of both worlds! And now for the news.

Developer News

Also the second module of the Preview series from **Audible Instruments** is now available for free. The **Random Sampler** corresponds to the Euro-Rack module Marbles from Mutable Instruments.

<https://vcvrack.com/AudibleInstruments.html>

Already last week **Geodesics** released version **0.6.4** of its modules. The modules were not only revised, but even new functions were added.

<http://www.pyer.be/geodesics>

Valley has released version **0.6.6** of its modules. Now the pre-delay in **Plateau** can be controlled by CV.

<https://github.com/ValleyAudio/ValleyRackFree/>

Submarine Utilities has now included in version **0.6.2** the highly anticipated **Wire Manager**. With this you can select individual colors for the patch cables, and even create your own colors.

<https://github.com/david-cl14/SubmarineUtility/>

New modules

Also this week we welcome a new module developer in the Plugin Manager.

Nocturnal Encoder published the amplitude modulation decoder module **NE-1** and the amplitude modulations encoder module **NE-2**.

<https://github.com/djpeterso23662/NocturnalEncoder>

Secretly also version **0.6.19** of **Bidoo** was released. This includes the pitch shifter **HCTIP** and the additive oscillator **PeNEqUe**.

<https://github.com/sebastien-bouffier/Bidoo>

Nysthi has released version **0.6.27** of its modules and with it the new module **Ratchet**, a ratchet generator.

<https://github.com/nysthi/nysthi>

With version **0.6.4** cf Modules has released **Dist**, a distortion and wavefolder.

<https://github.com/cfoulc/cf/>

Audible Instruments has added a second module to its Free series this week. **Segment Generator** corresponds to the Euro-Rack module Stages by Mutable Instruments and is an envelope generator and LFO.

<https://vcvrack.com/AudibleInstruments.htm>

Competitions

In **week 15** of the **Very Cool Patch Contest** the module to be used was **Ratchet** by **Nysthi**, except for this, only freely available modules may be used. Contributions can still be submitted until **Monday at midnight** and a

new contest with another module starts on **Tuesday**. In **week 14**, the module was the **VDPO** from **TriggerFish Elements** and the winner was **Jim Frye**. Congratulations to the winner and many thanks to all participants and all good luck for the next time.

Inspired by a post about the **Polish Radio Experimental Studio**, Damien Leverage aka the mysterious Wiggler has called for a challenge. **"Wiggle like its 1957"**. The following restrictions must be observed: 2 VCOs may be used, one of which is a sine wave and the other a square wave. A high pass filter of choice, but he should fit in 1957. A low pass filter of your choice, but it will be advised to Valerie. Two tape machines (e.g., two Confusing Simpler). A four-channel mixer and an oscilloscope. **Until October 17, time is to deliver a complete track.** More information under

VCV Rack - Día de los Muertos Vult Giveaway Contest

Leonardo Laguna Ruiz, the developer of the **Vult modules**, and Omri Cohen are hosting another **giveaway contest** on the occasion of the upcoming **Día de los Muertos**, the Day of the Dead. Although it's actually **two contests**. **If you don't own the commercial modules from Vult yet**, you can win both packages - Premium & Compacts. The patch to be created may only contain the free modules from Vult, as well as the Core Audio module and a reverb (no delay and no midi). If you want, you can also use additional modules of JW Modules.

For owners of the commercial modules, the price is the integration of their name or logo into Vult's 3 HP Blank module, so that it can be displayed in the scope - just like the Vult logo already is. In this case, all Vult modules may be used, but otherwise the conditions are the same.

The theme of the patch is supposed to be creepy and unsettling and the video has to be uploaded to Youtube by 31. 10. 2018 and a link to this video has to be sent to:

vultgiveaway@gmail.com. Afterwards there will be a vote in the official VCV Rack Facebook Group until 2. 11. 2018. More information at https://youtu.be/Ndgluk_yqb4
