

NEWS of the RACK VCV

key events • new modules • developer news • module videos • contests • and more

Hello, everyone in Rack-Land,

do you know what VCV actually means? No? Neither have I, and I have to admit I've never thought about it either. It's interesting that Andrew Belt himself admitted in the official facebook group that he doesn't know it either. But since I have been able to live very well without an answer to this question, I don't mind it at all. VCV rack is just great, that's all that matters.

And now for the news.

Developer News and other News

VCV Master Mind **Andrew Belt** will be giving a talk on "VCV Rack, the open-source virtual modular synthesizer" in Kingsport, TN on May 14th.

The **Superbooth 2019** casts its shadows ahead. From **9 - 11 May 2019** this popular fair for electronic musical instruments will take place in Berlin. As already mentioned there is also the possibility to meet other members of the **VCV community** to get to know each other, chat and eat/drink together. **Omri Cohen** has opened a facebook group especially for this purpose.

On **Google Maps** VCV-Rack users can now register on a map. This visualizes where users are situated.

The **Sculpt-O-Sound Vocode-O-Matic** has been revised and is now available in version **0.6.4**.

New Modules

Again we welcome new module developers.

Unfortunately I forgot to mention **CatroModulo** last week, but these modules are now also available in the Plugin Manager and three more were added, so that version **0.6.4** comes with 6 modules. These are **8x1fo**, **8xatn**, **PreSetSeq**, **vcClk**, **vcClk++** and **1hp blank**.

Hammondeggs starts with no less than 7 modules (as beta versions). **BBD** is a Bucket Brigade Delay Emulator, **Phase3** a 3 Phase Oscillator, **SID2CV** a C64 SID Player, **COMBI** a C64 Combination Waveform Oscillator, **DIGIMOD** a C64 SID Style

Ring Modulator, **SIDENV** a C64 SID Envelope Generator and **SIDLFSR** a C64 SID Noise Generator. The modules can be downloaded from the developer's github page and do not need to be compiled (at least for Windows) anymore.

Not all modules in the VCV rack are directly related to the music. Some facilitate the work and some are there for the optics. So also the **Milkrack** module from **Korfuri**, which brings classic **Winamp graphics** into VCV rack. This is available in an **embedded version** and a freely scalable **windowed version**. On the github side of the developer there are binaries for all Operating systems.

Challenges & Collaborations

Very Cool Patch Challenge

In **Edition 30** of the Very Cool Patch Challenge, the module to be used is the **PLL Phased Locked Loop** from **Frozen Wasteland**. Contributions can be submitted until **May 6th** and these will be summarized in a playlist as usual.

In **Edition 29** any drum module could be used and the **playlist** is available at the following link <https://youtu.be/4axu28WObdQ?list=PL3uoDd-w5f0IyMySWMwuTAq9dm2c0zGIAi>

Weekly Challenge #3

The weekly challenge of the **VCV Blog** on **reddit** is this time to create a patch with a maximum of **15 freely available modules**, which **does not contain a mixer**. More information at https://www.reddit.com/r/vcvrack/comments/bg5lqf/weekly_challenge_3/

Collaboration chain patch game Nr. 1

One World - One Voice did it, VCV-Rack now also has a **musical chain letter**. It all started with **rsmus7**, who also had the idea for this action. He has created a patch and invited to **develop it further**. Branches are definitely desirable, so that completely new things can develop from it. More information about CCPG # 1 is available at

Geodesics calls for the Gold Edition Challenge:

==THE CHALLENGE==

Use the **demo patch of Entropia**, and turn it into something of your own, make it evolve, or destroy it as long as the DNA is kept. **Attention, a simpler version of the patch is now available** <https://patchstorage.com/entropia-easy/>

== THE DEADLINE ==

28 April 2019 no timezone – to be followed by one week of vote

==THE REWARD==

A **redesigned gold edition** of the entire Geodesics collection (5 modules). This pack will never be public and will be enjoyed only by the winner of the challenge. In case of a tie, the design will still be different for each winner.

For more information about the rules, see <https://community.vcvrack.com/t/geodesics-gold-edition-challenge/2762>

CALL FOR SUBMISSIONS: Drone Day 2019

After the Winter Sostice Drone **Ben de Groot** alias ablaut now calls for participation in **Drone Day 2019**. This is on **May 25th** and like last year he would like to release a drone mix on

Bandcamp for free download. The deadline for contributions is **19 May**. A click on the picture leads to the original article and **further information**.

Switched On Rack Vol. 2, an album with VCV-Rack music is now available on **Bandcamp**. You can also sign up for a **list** for the 3rd edition of this compilation.
