#12 - Week 37/2019

Hello, everyone in Rack-Land,

I'm just studying right now. And by that I mean not only the handling of constantly new audio, video and DTP programs, but also of new modules. I must honestly say, the offer is almost overwhelming. A look into the module browser lists 1428 modules, of course including blanks and self compiled versions. I've decided to use a few new modules in every new patch, but sometimes it's not that easy, because I know exactly what I want to achieve and which module is suitable for it. And then you want me to try something else? That's it! If I were looking for the easiest way, I would certainly not have ended up with modular systems. Admittedly, I wouldn't describe the operation of my beloved Wavestation as simple, but at least I know which element does what. In VCV-Rack we are now so beyond the conventional East-Coast structure of VCO-VCF-VCA-LFO-ADSR that there is not even a West-Coast equivalent for some modules and you really have to talk about a new/combined/free approach. Some modules I can't even imagine as hardware. Even though VCV-Rack was started as a virtual Euro-Rack and still describes itself as such so that it can be classified by outsiders, it has long since developed into its own musical instrument. Generative is the magic word, my master keyboards stand around unemployed most of the time, sequencers, quantizers and random generators have taken their place. But that doesn't mean that the results are random, I'd rather call it organic or interdependent. I have long since said goodbye to a linear way of working. Rather, I now compare it to writing songs in a band. There is an idea at the beginning and everyone contributes his part to it. And at the end there is a total work of arts, which is more than the sum of the individual parts. I have the idea and the modules make things out of it that I might not even have thought of and this band has 1428 members!!! The tags in the plugin browser should help to get an order in here, so I can always decide if I want to call an old buddy or give an interesting newcomer a chance. And there are many of them in VCV-Rack.

and now to the news

Developer News & other News

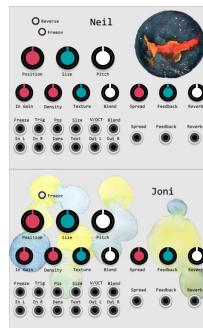

The recently released commercial module **Chords** by VCV has already received the first update with version **1.0.1**.

Amalgamated Harmonics has reworked its modules and is now at version **1.0.2**.

Count Modula offers from version **1.4.0** for all its modules 5 different **color variants**. Experience says, it will not be long before this version is available in the Plugin Manager.

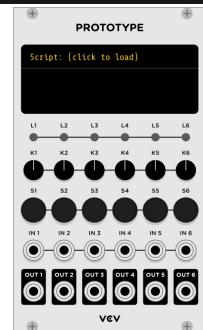

moDlz updates its modules again with version **1.1.4**.

The modules from **Arable Instruments / Parable Instruments** are now also available for **Rack V1**. **Joni** is the official **firmware** version of Mutible Instruments Clouds, in **VCV-Rack** the **Texture Synthesizer** from **Audible Instruments** and **Smoke** from **Southpole**. **Neil** is the **parasite** firmware with the additional models **Oliverb** and **Resonestor** and currently the only parasite variant of the module, as the **Smoke** variant of **Southpole Parasites** is not yet available.

New Modules

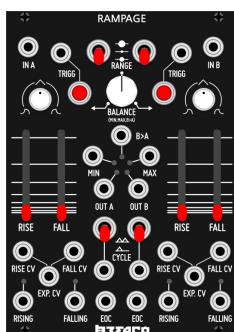

Also this week there is a new teaser on an upcoming module of **Frozen Wasteland**. With the **Probably Not(e) Chord Expander**, the module just released receives a chord option. The developer's version **1.9.5** will soon be available in Plugin Manager.

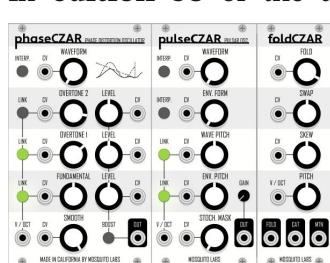

Simply **Prototype** is called a new module of **VCV**, with which one can create its own **VCV** modules by **Java Script**. Other programming languages should follow.

Challenges & Collaborations

Edition 39 of the Very Cool Patch Challenge uses the module **Rampage** by **Befaco**. Submissions can be submitted until **September 16** and are then summarized in a playlist. A new challenge starts the next day.

In **edition 38** of the **all three oscillators** of **Mosquito Labs** were to be used. The contributions are summarized in a playlist.

Musical Pals

The musical chain letter **Musical Pals** now has a few rules that simplify the **cooperation**. <https://community.vcvrack.com/t/musical-pals-4-collab-project/5691>

VCV Rack Patch Files and Giveaway

PATCH & TWEAK

Patch & Tweak have now also released **Patches** after the blank modules. These were created by **Omri Cohen** and with the publication, there is a **giveaway**. More information can be found at <https://youtu.be/ENbOdKG6rNc>

If I have overlooked someone, I'm sorry.
Then please let me know.

Current module versions of the developers
(not all are in the plugin manager and
some have to be self compiled.)
Changes are highlighted in red,
V1 versions magenta.
