NEWS of the RACK VCV

key events • new modules • developer news • module videos • contests • and more

Editorial

Hello everyone in Rackland,

one of the great things in VCV-Rack is the possibility to load and edit patches created by other users. The current Very Cool Patch Challenge is based entirely on this, because it is about creating new patches with a "fixed rack" of another one. The prerequisite for this is, of course, that all the modules used are also available on your own system, but with free modules it is no problem to install them later. It is always very interesting for me to analyze the patches from others and I have already learned a lot from this, because each of us has his little tricks that are self-evident for him and therefore often not thought of and not everyone divides them into Form videos with the community, such as Artem Leonov and Omri Cohen, but used them casually in his patches.

You can find most of the published patches on Patchstorage, but I also list all the links in the News of the Rack and additional patches that I found elsewhere. I would be happy to publish further links if you provide them to me. I am happy every time new names appear in the list. This shows that our community is alive and developing.

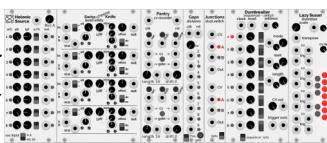

And now for the news

Developer News & other News

Stellare Modular has announced an update to its **Link** module. New functions will include be: Start / Stop Sync, BPM Output and Clock Divider.

The latest version of the modules from **Hionic Systems** is number **1.0.5**.

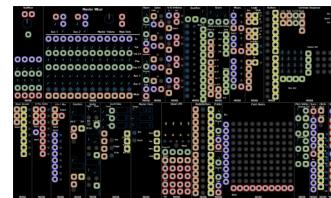

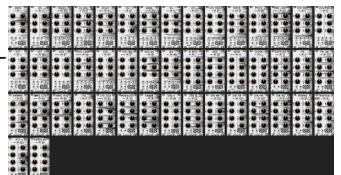

Aunty Langton's Musical Ant has been revised with version **1.0.1**.

Interrobang has also revised its **Scribble Strip** module with version **1.0.2**.

The **kocmoc** modules have also received an update with version **1.2.9**.

The **Nozori** modules from **nozoid** were revised again with version **1.1.5**.

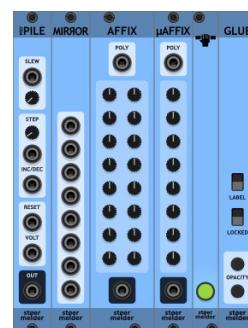

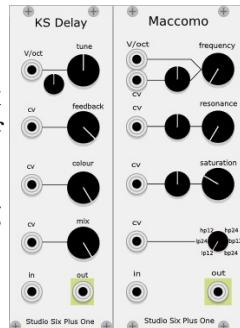

Strums Mental Modules are now at version **1.0.2**.

Rackwindows brings the **Airwindows** modules, previously only available as AU and VST, to VCV-Rack. The modules **Capacitor** (Mono / Stereo: Filters), **Chorus**, **Distance**, **Dual BSG** (Dual gain shifter), **Hombre**, **MV** (Dual-mono reverb), **Tremolo** and **Vibrato** are not yet in the library and have to be compiled yourself.

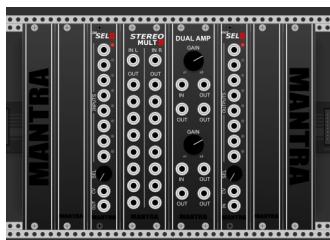

StudioSixPlusOne provides on its github page for Linux and Windows Beta versions of its modules **KS Delay** (Karplus Strong) and **Macromo** (Moog Style Ladder Filter).

News from **stoermelder**. The current Nightly Build contains the new modules **AFFIX**, **μAFFIX**, **DETOUR**, **GRIP**, **MIRROR**, **POLY-PILE** and **GLUE** as beta versions.

New Modules

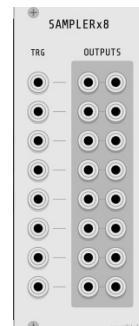

New in the library is **Mantra** with the utility modules **Dual Amp**, **StereoMult8**, **InSel8** and **OutSel8**.

With **Modular Forecast** from **Aura Audio**, you can now display sounds in VCV rack as weather. At the moment, however, there is only snow in the form of white squares.

Kosmodules is now also available via the library, but for the time being only the free offsetter **OSFx2**.

New from **Bidoo** is **8re**, a pattern management tool (not only) for the sequencer **zOù MAï**.

SamplerX8 is the name of a compact eight-fold sample player from **voxglitch**.

In version **1.1.4 Submarine** extends its range with the modules **HS-101 Hi-Res Storage Scope** and **LT-116 Linear Transformations**.

Challenges & Collaborations

Very Cool Patch Challenge

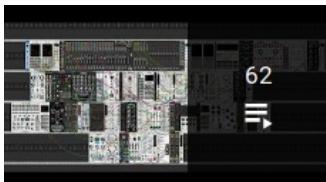

Edition 52 of the Very Cool Patch Challenge, is part 2 of a 2-part challenge and the sequel to Edition

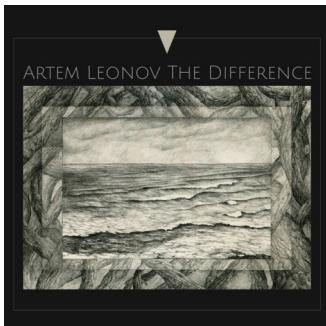

51. This time it's about creating **new patches** with one of the fixed racks from the past month. A maximum of 2 modules can be exchanged. At least 3 patches should be created by May 4th.
