REGEN v1.0.2 MODULAR

cyclex ifo noise

modular.studioregen.com

**Hello everyone in Rackland,**

It wasn't that long ago, I thought that not much will happen before the release of Rack 2.0 because there was very little to report. Certainly some developers are in the starting blocks, but new modules, beta versions, announcements and new developers show how popular VCV-Rack and our community really is. And apparently also attractive for developers of hardware modules, because this week there are new hardware clones and we know from various announcements that this will continue. I mentioned in a previous issue of News of the Rack that I think it's a great marketing strategy, that you can test modules in a virtual environment before you buy, and I hope more module developers take this opportunity. The fear is expressed time and again that virtual plug-ins are displacing the hardware. Reality shows us, however, that VCV-Rack and other plugins are more of a springboard into the hardware world. It's not about one being better than the other. Both have advantages and disadvantages and complement each other beautifully.

And now for the news

# Developer News & other News

The **Synth Panel Designer**, an extension for **Inkscape**, was released last week. This tool is primarily aimed at developers and is supported by **Faselunare** and **Soundmit**, the latter are operators of the official VCV-Rack Facebook page.

**Regen Modular** has announced version **1.0.2** of its commercial modules. All previous modules will probably be expanded to include additional functions. However, there is not yet an exact release date.

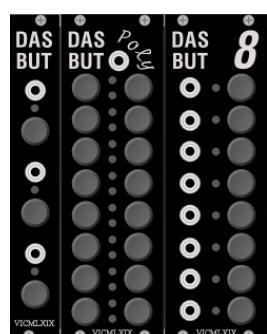

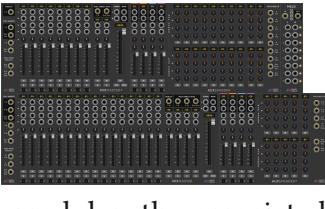

[modular.studioregen.com](http://modular.studioregen.com)

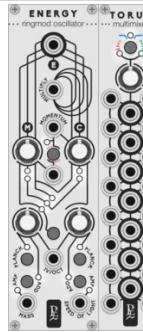

With version **1.1.7** **Impromptu** has expanded its **Write Sequencers** **32** and **64**, the Controllers **Tact**, **Tact1** and **TwelveKey** and its Clock Modules **Clocked** and **Clkd** by additional functions.

Together with **Steve Baker**, **Marc Boulé** is also responsible for **MindMeldModular**. The improvements here concern the **MixMaster** modules, the associated **AuxSpander** modules and the **Meld** module.

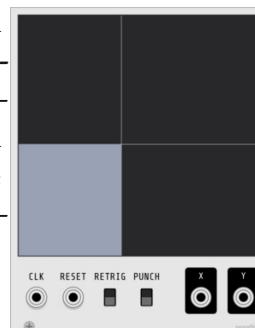

Truly is a new developer who publishes his first modules on his github page. A Windows version of the three controllers **DASBUT**, **DASBUT8** and **DASBUT-Poly** can be downloaded. Of course, the source code for self-compilation is also available.

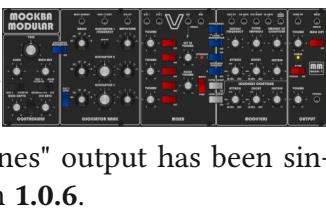

Another **Marc Boulé** project is **Geodesics**, here with **Pyer**. Version **1.1.2** of **Torus** and **Energy** now also have additional options.

With version **1.18.0** the **vox-glitch XY** module now has the option in the context menu to set the working area of the controller.

The NES emulator **RackNES** by **KautenjaDSP** is also constantly being developed. With the latest update **1.4.0** it is now possible to load a ROM file by dragging it onto the module and dropping it.

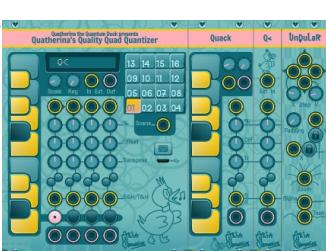

The Mini Moog for VCV-Rack, the **Model V** from **Mockba Modular** has also received an update. The virtual "Phones" output has been single-channel since version **1.0.6**.

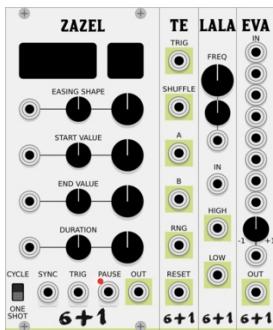

With version **1.0.6**, **Captain's Sounds** has revised its **Dip**, **Nip**, **Mio**, **Pow** and **Dbug** modules.

## Beta-Versions (wip)

**Quatherina the Quantum Duck presents Quatherina's Quality Quad Quantizer** by **Aria Salvatrice** is available in triplicate and all of them can also be used as expanders. **QQQQ** is the mother of all ducks and can also create scenes, all quantizer functions are available in **Quack** and **Q<** is the chick without piano keys. Binaries are available for all three operating systems.

# New Modules

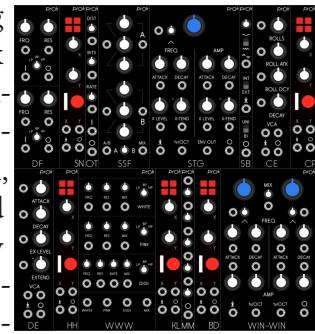

In the department "Yesterday still beta" we have **StudioSixPlusOne** with **TE** (expander für Tyrant), **LALA** (2-way crossover filter), **EVA** (VCA) and **ZAZEL** (LFO) this week.

unless modules introduced us primarily to Mr. Chainkov, now there are 4 new modules in version 1.1.0. **tancor** is a sequencer, **SNAKIA** also, but based on a snake game emulation, **room** is a utility module with which you can move complete rows of modules in rack and **towers** a fader module with 2x 16 faders.

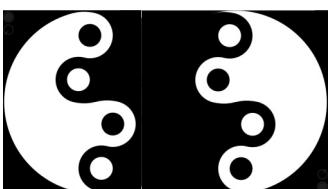

**Zzzorb** from **Alright Devices**, a 4-pole multimode filter with VCA, also came out of the blue. Like the other two modules from Alright Devices, Zzzorb is a free clone of the Euro Rack module of the same name.

Five of the morphing drum modules from **Prok Modular** also have hardware models in the Euro-Rack world. **Bass Drum**, **Clap**, **HiHat**, **Klonk** and **Snare Drum** are not only simple drum modules, because you can morph between 4 sounds and there are numerous sound banks for free download. The modules themselves are chargeable, but you get a total of 16 modules for \$ 25. Other modules are the Shift Register **Shifty Business**, the envelope generator **Clap Envelope**, the Noise Generator **Whistle While You Work**, the distortion module **Overtime**, the envelope generator **Drum Envelope**, the oscillator Skin In The Game, the drum oscillator **Win Win Situation**, the six-times rectangular oscillator **Six Square Feet**, the Mixer **Micro Mixer**, the Filter **Dual Filter** and the Expander **Quad Selector Expander**.

## Challenges & Collaborations

### Very Cool Patch Challenge

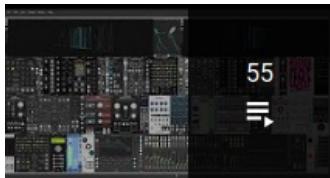

The theme of Edition 55 of the **Very Cool Patch Challenge** is "**Contrast**". It is up to you how the topic is interpreted. The challenge is still running. The contributions are summarized in a playlist.

**Edition 54** of the **Very Cool Patch Challenge** once again focused on a single module. This time, a patch should be created using the **Arp** module from **Hampton Harmonics**.

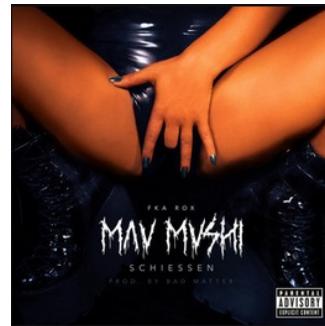

## Music & Ideas

If I have overlooked someone, I'm sorry.  
Then please let me know.

Current module versions of the developers  
(not all are in the plugin manager and  
some have to be self compiled.)  
Changes are highlighted in red,  
V1 versions magenta.
