# NEWS of the RACK vcv

key events • new modules • developer news • module videos • contests • and more

The grid contains the following thumbnails:

- Top-left: A complex modular patch with many oscillators and filters.
- Top-center: A video thumbnail for "VCVRACK TINY TRICKS SN-OSC" at 2:15.
- Top-right: A close-up of a VCV Rack interface showing various knobs and controls.
- Middle-left: A patch featuring four mixtures labeled Mixture 1 through Mixture 4.
- Middle-center: A video thumbnail for "VCVRACK TINY TRICKS WAVE3" at 5:09.
- Middle-right: A patch titled "HARMONIC CONVERGENCE OSCILLATORS" with various waveform selection and modulation controls.
- Bottom-left: Two large yin-yang symbols.
- Bottom-center: A video thumbnail for "VCVRACK TINY TRICKS SWITCHING METHOD" at 2:35.
- Bottom-right: A patch titled "FILTERS WITH A TWIST" featuring various filter sections.
- Second row, left: A video thumbnail for "LVL 39" at 39:00.
- Second row, center: A patch titled "THE WAH TUTORIAL" featuring a wah effect section.
- Second row, right: A patch titled "LET'S BUILD AN AMBIENT PATCH FROM SCRATCH IN VCV RACK" featuring a complex ambient sound generator.
- Third row, left: A video thumbnail for "MODULAR SOUND DESIGN WITH: VCV RACK #052" at 5:22, with subtitles in Spanish.
- Third row, center: A video thumbnail for "BANJO" at 2:51.
- Third row, right: A patch titled "COMING SOON... SWEET LOOKING, SWEET SOUNDING FILTERS" featuring a filter section.
- Fourth row, left: A patch titled "WORKFLOW TIPS" with a list of tips:
  - MOUSEWHEEL CONTROL
  - ZOOM TO FIT/ZOOM OUT
  - ARP CONTROLLING
  - EX FLEXIBLE ROUTING
  - MACRO KNOB CONTROL
- Fourth row, center: A patch titled "TIPS" featuring a granular synth section.
- Fourth row, right: A patch titled "Granular synth tutorial in VCV Rack" featuring a granular synthesis section.

## Hello everyone in Rackland,

do we have a racism problem? I think not in our community, but in society as a whole. And by that I don't just mean the USA, we cannot overlook it here in Germany either, although we discriminate against all "asylum seekers" regardless of skin color.

This situation is unbearable for many people and I am one of them. However, some actions are so absurd that you no longer know what is right or wrong. I am writing this off-topic topic here in the foreword because it has kept me busy all week and I hope that is okay for you.

This is the coat of arms of my hometown Coburg. (more from Wikipedia: Today's coat of arms represents the patron saint, Saint Mauritius, who, according to Christian tradition, has been revered in the appearance of a Black African at least since the high Middle Ages. Mauritius is considered the leader of the Thebaic Legion and a fighter for the Christian faith, who is said to have been carried the Holy Lance and is on Coburger coins and a silver hallmark of the 14th and 15th centuries, with the colors still valid on documents since the 16th century. The historical coat of arms was exchanged in 1934 during the Nazi era with a sword having a swastika in the pommel on a shield split by black and gold. Since the announcement on May 1, 1945 and approval of the provisional city committee on August 6, 1945, the city coat of arms shows again the (heraldically called Mohr) St. Mauritius, initially in different designs, from 1974 in today's form.)

An online petition was launched last week with the aim of abolishing the coat of arms because it would be discriminatory. The initiators see the presentation as racist, but are not themselves affected by it. Others (including me) consider it racist to change the coat of arms because it honors a person and there is no reason to withdraw this honor. Naturally, there are also racists who refuse to honor a man of African descent and, of course, they also support the petition, although their motives are completely different.

It is always very important for me to ask the people who actually concern it, so I created a survey <https://www.surveymonkey.de/r/RW7QK5L> and hereby ask everyone in our community with African roots to do so participate. The question is very simple: "Do you feel discriminated against by the representation in the Coburg coat of arms?" and the answer options: "yes / no / neutral. You are very welcome to pass on the link and do translations.

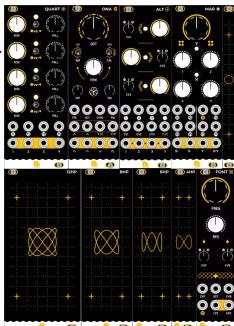

And now for the news

# Developer News & other News

Andrew Belt reminds that in the **Issue Tracker** you can **vote** for suggestions by "thumbs up" on the first post. The top-rated topic currently has only 18 positive votes, the tenth-best rating only 4. These are, with more than 100,000 users, not enough data to prioritize suggestions,

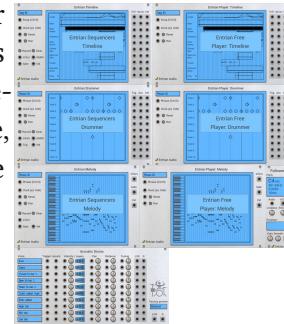

After the just released version number 1.6.0 with the ONA oscillator, **NANO Modules** has already made improvements with version **1.6.0.2**.

The developer of the **JW Modules**.

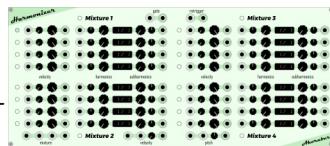

The website [cdm.link](http://cdm.link) has dedicated a whole article with patches and videos to **Jeremy Wentworth**, the developer of the **JW Modules**.

The current version number of the **Entrian** modules is **1.1.16**. Numerous improvements have been made, which can be found on the developer's website.

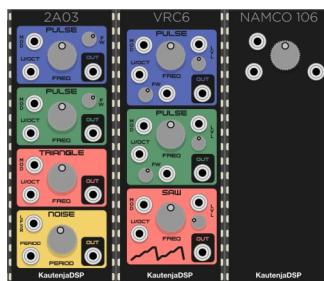

## Beta-Versions (wip)

**IggyLabs** is a new developer and has released the binaries for a pre-release version of the wavetable oscillator **table** on its github page.

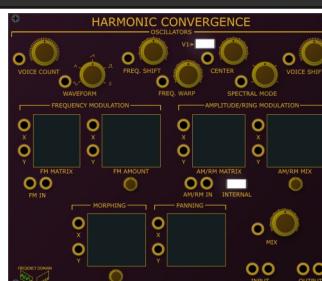

The **Ahornberg** Harmonizer is currently only available in a self-compilable beta version.

After the RackNES, **KautenjaDSP** is now seasoning its offer with Potato Chips. Retro sound chips are hidden behind this name. The modules **2A03**, **VRC6** and **Namco 106** are available as pre-release versions to compile yourself via the github page of the developer.

## New Modules

**Frequency Domain** announced the **Grains of Wrath** module last week and it is already available in the library and with version **1.6.1** a bug was eliminated.

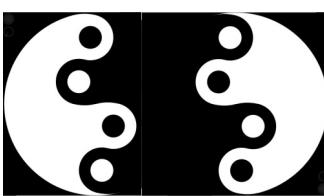

And some modules come as a complete surprise. Announced by Omri Cohen a few days ago, the **Oxidlab Entferner** modules are already available in the library. The freely available **Entferner LE** version includes a 12 dB mono Lowpass filter and the left side of a blank

module. In the paid version you get the **other half** of the plate and the stereo filters **Entferner L** (low pass), **Entferner B** (band pass) and **Entferner H** (high pass). Each of the commercial filters offers several slopes. The blank modules also contain an **Easter egg**. But I won't tell you more.

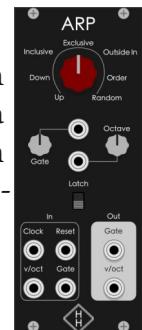

# Challenges & Collaborations

## Very Cool Patch Challenge

The theme of Edition 55 of the **Very Cool Patch Challenge** is "Contrast". It is up to you how the topic is interpreted. The challenge is still running. The contributions are summarized in a playlist.

Edition 54 of the **Very Cool Patch Challenge** once again focused on a single module. This time, a patch should be created using the **Arp** module from **Hampton Harmonics**.

If I have overlooked someone, I'm sorry.  
Then please let me know.

Current module versions of the developers  
(not all are in the plugin manager and  
some have to be self compiled.)  
Changes are highlighted in red,  
V1 versions magenta.
