#01/2020

### Hello everyone in Rackland,

I wish you all a super great new year. I celebrated the end of the year with a cold, so the news comes later. As already mentioned, this is a double issue because I packed week 52 with it. 2019 was an incredible year for VCV-Rack. Not only rack V1 was released, but also at least 1897 modules (including blanks and self-compiled). The next version of Rack V2 is expected to be more straightforward for developers as the modules do not need to be converted. Many features have already been teased and I also reported about them in the News of the Rack. However, I find it very remarkable that VCV-Rack is still not generally known to the target group. I keep mentioning it when I am exchanging ideas with friends who also make electronic music. Nobody knew about this VCV rack yet, although the interest is definitely there. V1 has shown that you can work professionally with VCV-Rack, I am looking forward to the optimizations that V2 will bring.

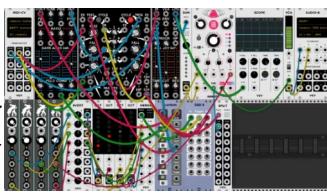

And now for the news

# Developer News & other News

VCV continues to make us want Rack V2 with a new announcement. Accordingly, it will be possible to save a separate template for each module, which will be loaded automatically when added.

The two latest fee-based modules from **Friedrichs Audio Dark Alias** and **Killjoy** have been completely revised. You now have expanded polyphony and the CPU consumption has been drastically reduced.

The modules **EQ3** and **A+B Bus** from **huaba** have now also been converted to Rack V1. However, they are currently not yet available through the Plugin Manager.

This time we welcome several new module developers.

**Aunty Langton's Musical Ant** is a semi-automatic sequencer based on the principle of Langton's Ant, a variant of the Turing Machine.

Studio Regen publishes the commercial plugin **Regen Modular**. For \$ 20 you get the oscillator **cyclex vco**, the LFO **cyclex lfo**, the sequencer **frames**, the retro chip sound oscillators of the Nessie series **pulse**, **tri**, **noise**, **saw**, the chromatic quantizer **quan** and the two utility modules **const** and **xfade**.

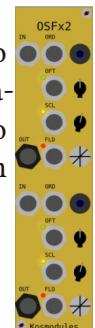

In version **1.0.6** Squinky Labs primarily revised the sequencer **Seq++**. The feature **xforms** is new, with which notes can be transformed in different ways.

The paid plugin **Loopus Modules** by **Sonus Dept.** has been revised and is now available in version **1.2.0**.

The **Kosmodules free** plugin was also converted to V1, but is still not downloadable in the Plugin Manager. The two commercial modules have not yet been converted.

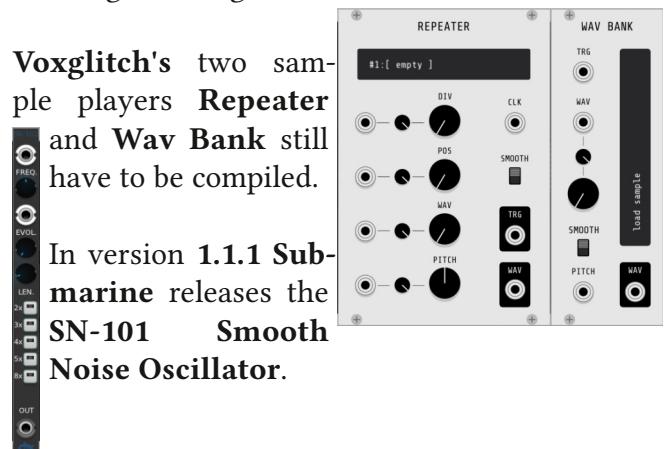

## New Modules

**Sckitam** publishes the **MarkovSeq** sequencer, which is based on Markov chains, and the two utility module modules **2DRotation** and **2DAffine**. The modules are not yet available in the Plugin Manager.

**Voxglitch**'s two sample players **Repeater** and **Wav Bank** still have to be compiled.

In version **1.1.1** **Submarine** releases the **SN-101 Smooth Noise Oscillator**.

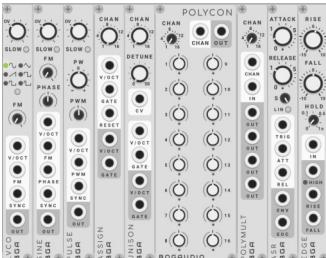

I have already introduced some of the new modules from version **1.1.26** of **Bogaudio**. Now this version is available in the Plugin Manager and

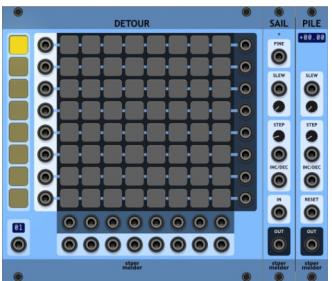

there are also the oscillators **LVCO**, **SINE** and **PULSE**, the utility modules **ASSIGN**, **UNISON**, **POLYCON** and **POLYMULT** and the two envelope generators **ASR** and **EDGE**.

**Sonus Modular** releases in version **1.3.0** the oscillator **Fraction**.

The latest modules from **stoermelders PackOne** are not yet in the Plugin Manager. In version **1.5.0** the 3 utility modules **Detour**, **Sail** and **Pile** will be added.

In version **1.6.0 RJModules** releases the **Chorus** effect module and the **Octo** modulation module.

## Challenges & Collaborations

### Very Cool Patch Challenge

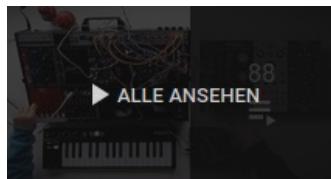

At the start of 2020 there is a special **very cool patch challenge**. Exactly **20 modules** (without audio module and recorder) are to be used in **Edition 47** or there should even be a collaboration in which both partners use 20 modules each. Contributions can be made until **13.1.** submitted and a new challenge begins the next day. As always, the contributions are summarized in a playlist.

**Edition 46** of the **Very Cool Patch Challenge** used the **Mother** module from **OrangeLine**. The contributions are summarized in a playlist.
