#19 - Week 44/2019

Hello, everyone in Rack-Land,

it is again this time of the year when it is nasty, wet and cold outside and you make yourself comfortable inside with a good book, a nice film, your favourite drink and a blanket. And it's the time when you spend a lot of time with your hobby.

In the last week I actually didn't just make music for the VCP and other challenges and create news and tutorials, but just for fun and pleasure.

I did this without a specific goal, so it's not hard for me to use modules I haven't used before. I find this very experimenting very fascinating and I seldom read the operating manuals for it. Why should I, if there are such great videos to most modules. So I miss the videos of "The Art of Sound - Talking Rackheads" a lot and hope Nigel is all right. Greg sporadically publishes videos under the name "Modular Curiosity", but they are always very inspiring. But you can look forward to the videos of Artem and Omri regularly and almost right on time.

Especially Omri's live streams are always an experience and I learn something new every time or at least find my own ideas confirmed. The result is always fascinating. No matter how chaotic it can be at times, in the end it's all good. And the best thing is that the patches allow you to understand for yourself what Omri actually did. Because quite honestly, sometimes it seems to me as if he had just conjured, some sounds change so quickly. But it's great to be there and even to be involved. But I still have one point of criticism, because in the past you could rely on having a virtual meeting with friends on Friday evening at 8 pm CET at Omri's Live-Stream. Meanwhile, these are often at different times and quite short-term. That's a good way to miss one. Fortunately you can watch the video later, but nothing beats the experience when all over the world Racklanders take a "Schluck" at the same time when Omri has deleted a scope again. Then we are all united in sweet bliss and no bad weather can ruin it for us.

And now for the news.

Developer News & other News

Glue the Giant has now officially released version **1.0.4** and with it the **Night Ride theme**. This can be selected in the context menu and also defined as standard.

Also the modules of **Surge** will soon be available with **different skins**. If you can not wait, you can download a beta version for all 3 operating systems.

The **DrumKit** modules by Jerry Sievert are now available with version **1.1.2**, as before their commercial version, under **SV Modular**.

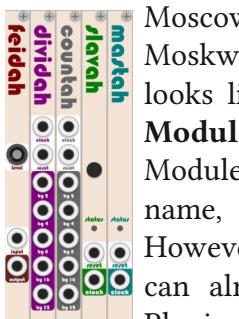

Impromptu Modular has re-optimized its modules in version **1.1.2**.

Also the **mental** modules of **Strums** were revised with version **1.0.1**.

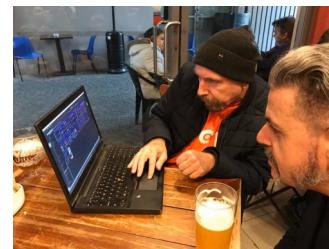

Also this week we are looking forward to a new module developer.

Moscow is known to be in Russian Moskwa and in the Cyrillic alphabet it looks like mockba. Whether **Mockba Modules** is pronounced as Moskwa Modules or whether this is a proper name, we will hopefully soon learn. However, the developer's five modules can already be downloaded via the Plugin Manager. **Feidah** is an attenuator, **Dividah** a clock divider, **Countah** a binary counter, **Mastah** a UDP transmitter for

Orca's Heart from **scanner-darkly** is now available through the Plugin Manger and has been updated with version **1.0.1**.

As part of **Soundmit 2019**, some Racklanders met in Turin (Italy). It will be interesting to see what ideas were hatched there. In the picture you can see

Eric Sterling (**Frozen Wasteland**) with Andrea Grossi (**The Great Assyr**). The one and only **Bo Beats** has also interviewed Jakub Mudrak (**Midilar**) about his VCV hardware controllers. (see videos)

A developer who is still sorely missed in Rack V1 is **MSM**. Now, Michael Struggl has officially agreed that his modules **may be converted by other developers** because he himself probably will not. Thanks for all Michael and hopefully this is not a final goodbye.

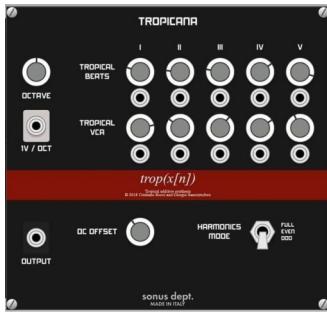

New Modules

Also this week we are looking forward to a new module developer.

synchronization with other VCV rack instances on other computers on the same network, and **Slavah** the associated receiver. Hopefully there will be a video soon, showing how it works.

Charred Dessert is another module series by Jerry Sievert and now also appears under the label **SV Modular**. New in version 1.3.0 is the Wave Multiplier **Tsunami**.

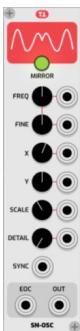

Sonus Modular released with version **1.2.0 TROPICANA**, an additive oscillator based on the principle Tropical Additive Synthesis by Cristiano Bocci and Giorgio Sancristoforo.

At the moment there does not seem to be a week in which a new module of **Tiny Tricks** appears. New this time is the Simplex Oscillator (**SN-OSC**).

RJModules also publishes new modules weekly. This week it's the chord module **Playable Chords**, the Limiter **Brickwall** and the Delay **PingPong**.

Also **stoermelder** is busy developing new modules. **TURN-SEQ** is not yet available in the Plugin Manager.

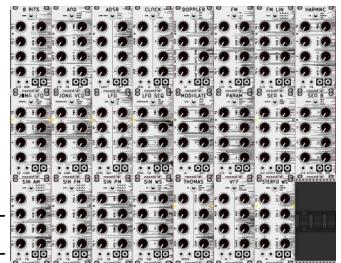

New modules will also be available from **Starling**. These are the two **Via** oscillators **OSC3** and **Sync3**, which can be compiled as beta versions themselves. Both are again free VCV-Rack versions of commercial Euro-Rack modules.

Kocomoc could also be the Cyrillic version of the term **cosmos**. However, it is certain that the developer of the same name released the trigger sequencer **TRG** with version **1.0.2**.

Count Modula released the Bernoulli-Gate **Chance**, the CV-Adder **Offset** and the controller **Fade** with version **1.5.0**.

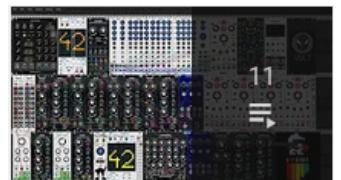

Nozoid has now also converted the modules of the **nozori84** series for VCV-Rack. Unfortunately, these also require a sampling rate of **96 kHz**. That's why I do not go further here.

Challenges & Collaborations

Very Cool Patch Challenge

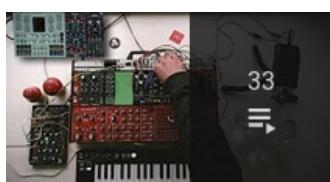

In **Edition 43** of the **Very Cool Patch Challenge** the task was to use only one module as a tone generator and to alienate it with other modules. Submissions can be submitted until **11th November** and will be put together in a playlist. A new challenge starts the next day.

Edition 42 of the Very Cool Patch Challenge was all about this particular number and the **question and answer** topic. The contributions are summarized in a playlist.
