#26 - Week 51/2019

Hello dear rack-landers,

of any gender in the whole world. I couldn't care less whether you celebrate this or any other festival or not at all. Now if you have some free days, enjoy them with people and things you like. If you have to work, then I have the greatest respect for you, because you are the real heroes. I wish all those who are currently not feeling well for a variety of reasons much strength and I wish common sense to all decision-makers. That would be something!

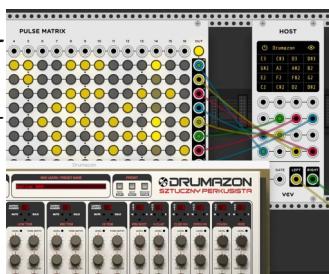

And now for the news.

Developer News & other News

Some module developers provide different skins for their plugins. **VCV** has now started a survey as to whether a **dark skin** is also desired for the panels and components of the VCV modules. 83% of users voted for it, but it is still possible to participate in the vote.

The paid plug-in **VCV-Host** received update **1.1.0**. It now also transmits MIDI note gates/triggers, which means that VST drum machine instruments can now also be controlled. There are also presets for common drum pad layouts. Further improvements can be found in the changelog.

The update for **Orange-Line** in version **1.3.3** is now available in the Plugin Manager. Among other things, this fixed a compatibility problem with Linux.

The modules from **LO-GInstruments** are now also available in the Plugin Manager. The developer promises some improvements and an optimization of the graphical user interface. Further projects are planned.

Frozen Wasteland publishes four new modules. I have already announced **Probably Not (e) arabic**. The module has been completely re-

Lomas Modules has improved the stability of its advanced sampler and made further optimizations and is now at version **1.0.9**.

Bidoo has released several updates again within a week and is now at version **1.1.8**. Details can be found in the changelog.

Computerscare has also made some improvements with version **1.2.0**. Among other things, there are various polyphony options in the context menu of the Father and Son sequencer. More details can also be found here in the changelog.

The paid sequencer plugin from **Number9** has also been revised and is now in version **1.2.1**.

Entrian has equipped its chargeable drums plugin with a **sleigh bell** to match the Christmas season.

Version **1.0.9** of **Nysthi** has also made numerous improvements.

A bug has been eliminated in the **ZZC clock** module. The plugin is now at version **1.1.2**.

New Modules

vised again and is now officially available. **Just a Phaser** is a phaser in which almost everything can be controlled by CV, the **QAR - Warped Space Expander** enables the Quad Algorithmic Rhythm Generator to shift the time axis and

Drunken Rampage is a variant of the legendary Befaco module Rampage with controllable chaos,

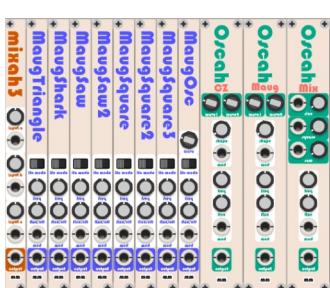

Euclidian from **RJ Modules** is called the Euclidean rhythm generator and already has some rhythms from different nations on board as presets.

Anyone who pulls the current version of **Submarine** will get the **Secret Santa** module, which festively changes all cables of a patch, for Christmas.

The **SV Modular Synthetic FX** plugin has been expanded and now includes a Delay module and another variant of the filter Curd called **Tuffet**.

Aria Salvatrice has already announced further modules. Now the second module called **Bendlet** has appeared, which is responsible for pitch bending.

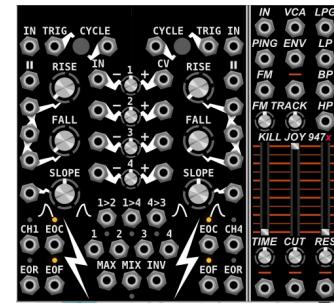

Mockba Modular published 43 modules within a few weeks. After the CZ oscillators, which are based on the Casio CZ synthesizer, 8 further oscillators have appeared, which are based on Moog waveforms. These are **MaugTriangle**, **MaugShark**, **MaugSaw**, **MaugSaw2**, **MaugSquare**, **MaugSquare2**,

MaugSquare3 and **MaugOsc**, which contains all waveforms. All oscillators are polyphonic and can also be operated as an LFO. Three more oscillators can be purchased for \$ 10 through the Plugin Manager. These combine the waveforms of the CZ and Maug series with **wave sequencing**. In addition to **Oscah Maug** and **Oscah CZ** there is also **Oscah Mix**, which mixes a sine, a rectangle and a sawtooth wave.

The new modules from **Bogaudio** have not yet arrived in the Plugin Manager, but can already be compiled yourself. **Mumix** is a version of Umix with a mute function, **Matrix44** is a 4-channel version of Matrix88, **Switch44**, **Switch88** and **Switch1616** are other versions, but without an Attenuverter, but with switches. **ARP** is an arpeggiator that creates an arpeggio from a polyphonic signal. Different directions are available.

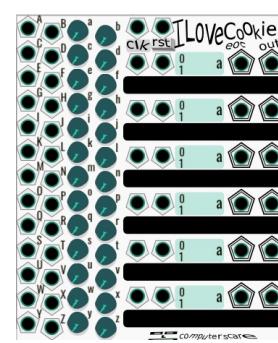

With **Kill Joy**, **Friedrichs Audio** has released another commercial module, an extremely versatile polyphonic low pass gate. **FLOATS** is now also **polyphonic** and is now definitely not just a clone of Maths.

Challenges & Collaborations

Very Cool Patch Challenge

Edition 46 of the Very Cool Patch-Challenge uses the **Mother** module from **OrangeLine**. Entries can be submitted until **December 30th** and will then be summarized in a playlist. A new challenge starts the next day.

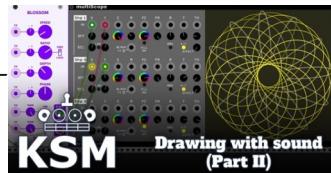

Edition 45 of the Very Cool Patch Challenge used the **I love Cookies** module from **computerscare**. The contributions are summarized in a playlist.
