NEWS
of the RACK
VCV

Hello, everyone in Rack-Land,

I thought, before version 1. 0 not much happens anymore, but last week it went round again. There's so much to report today, I'll start without any further prefaces. That's the way it has to be!
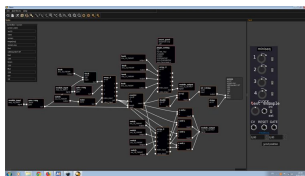

And now for the news.

Developer News and other News

On the **VCV website** there is now the possibility to **contact** them to get help for various things around VCV-Rack. https://vcvrack.com/contact.html

Hora Music has now released the beta version of its plugin maker **GeCo** on gumroad. A **free demo version** can be downloaded for testing purposes. With this program it is now possible to develop own modules for VCV-Rack without programming knowledge.
https://gumroad.com/horamusic

Vult has released version **0.6.26** of its modules. Vorg, Knock and Vortex have been improved, and bugs in Caudal and Send have been fixed.
https://modlfo.github.io/VultModules
Vult has also announced a „**Vult Mysteries**" module package. This should be a collection of simple modules.
https://www.facebook.com/groups/vcvrack/

Lindenberg Research has announced a new filter called **Vampyr.** This is a Sallen-Key Type 35 dual filter and should be available in April through the Plugin Manager.
https://www.facebook.com/groups/vcvrack/permalink/327359637924187/

Impromptu Modular has released version **0.6.17**. The sequencer Foundry has received an update. https://github.com/MarcBoule/ImpromptuModular

In version **0.6.5 Skylights** has equipped its expander **Vactrol** with an anti-pop system.
https://github.com/Skrylar/skylights-vcv

MicMusic has reworked its modules and is now at version **0.6.3**.
https://github.com/very-cool-name/MicMusic-VCV.git

The already introduced module **SoftSN Machine** from **8Mode** is now no longer beta version and with version **0.6.1** also arrived in the plugin manager. https://github.com/8Mode/8Mode-VCV_Modules.git

Edge has redesigned its modules and is now at version **0.6.4.**
https://github.com/Edge-Modules/Edge.git

In version **0.6.7** **SKJack** was supplemented by the two modules **8Rack>Jack** and **8Jack>Rack**.
https://github.com/Skrylar/skjack-vcv

Qwelk has released version **0.6.1** and with it the Oscillator **Indra's Net**.
https://github.com/raincheque/qwelk

New Modules
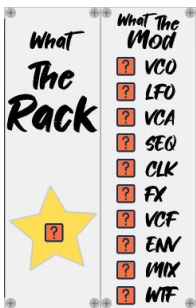

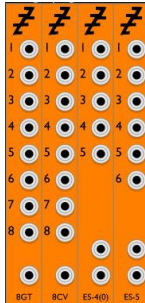

Also this week we welcome new product developers.

Although **Starling/Via** is not really new, VCV-Rack versions of its Eurorack modules **Meta**, **Sync**, **Scanner** and **Gateseq** can now be officially downloaded.
https://starling.space/via/rack

Expert Sleepers has released **VCV-Rack Encoders** for its ES-5, ES-4, ESX-8GT, ESX-8CV expander modules. These can now be downloaded in the Plugin Manager.
https://github.com/expertsleepersltd/vcvrack-encoders

WhatTheRack calls itself **Rack Randomizer** and calls 19 Random Modules with Random Settings + Audio Module in one click, **WhatTheMod** calls only a random module, but here you can set the module type from VCO to WTF.
https://github.com/korfuri/WhatTheRack.git

## Challenges

Very Cool Patch Challenge

In **Edition 27**, the module to be used was **Evolution** by **ML Modules**. The contributions are summarized as always in a **playlist**
https://youtu.be/JAf7Pa52JgA?list=PL3uoDdw5f0Izlt70d-rCtomxYgM-a-GrS

In **Edition 28**, the module to be used is ASAF-8 by **mscHack**. Entries can be uploaded at midnight **8/4/2019** and a new challenge will be announced the following Tuesday. More information in the official VCV-Rack forum at
https://community.vcvrack.com/t/very-cool-patch-challenge-edition-28/2564/9

Collaboration chain patch game Nr. 1

One World - One Voice did it, VCV-Rack now also has a **musical chain letter**. It all started with **rsmus7**, who also had the idea for this action. He has created a patch and invited to **develop it further**. Branches are definitely desirable, so that completely new things can develop from it. More information about CCPG # 1 is available at

https://community.vcvrack.com/t/new-collaboration-chain-patch-game-nr-1-is-on/2597
