NEWS
of the RACK
VCV

Hello, everyone in Rack-Land,

and another week's gone by. But this time I know where my time has gone, because episode 13 of "What does this knob do?" was full of surprises. The topic of VCAs is not as quickly dealt with as I thought, but that's a good thing. That's why I'm not quite done with it yet. But you will see all modules in one episode.
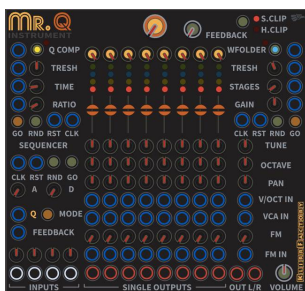

And now for the news.

Developer News
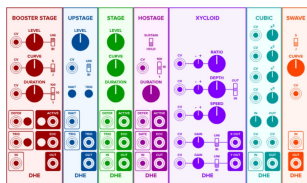

DHE Modules has released version **0.6.2** of its modules. **Xycloid** in particular was revised.
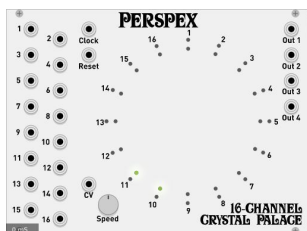

https://github.com/dhemery/DHE-Modules/

KlirrFactory has reworked its commercial module **Mr. Q**, which is now at version **0.6.5.** and available on the developer's website.

http://klirrfactory.com/

New modules

And also this week we welcome 2 new developers in the Plugin Manager.

Crystal Palace released **Perspex**, a complex 16-channel mixer.

https://github.com/djpeterso23662/CrystalPalace

STS has released a controller called **Illiad**, which is based on the Arp Odyssey, and an 11 channel switch named **Switch2to1x11**.

https://github.com/SmallTownSound/STS
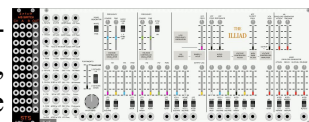

AS Modules has made its BPM to Delay/Hz Calculator more compact and now offers in version **0.6.11** of its modules a version without display called **BPM to Delay MS Calculator Compact**.

https://github.com/AScustomWorks/AS

Impromptu Modular has released version **0.6.11** of its modules. New are the **Big-Button Sequencer2** and the Fader Module **Tact1**. The other changes are so extensive that I recommend to read the corresponding Facebook thread.

https://www.facebook.com/groups/vcvrack/permalink/265374427456042/

Friedrichs Audio has added the Chiptune Oscillator **SID Oscillator 64** to its range of commercial modules. This is an emulation of the Commodore 64.
https://gum.co/SidOsc64

Competitions

In **week 16** of the **Very Cool Patch Contest**, the module to be used was the **Random Sampler** from **Audible Instruments.** Except that, only freely available modules may be used. Contributions can still be submitted until **Monday at midnight** and a new contest with a different module will start on **Tuesday**. In the **15th week** was the module **Ratchet** by **Nysthi** and the winner was **Omri Cohen**. Congratulations to the winner and many thanks to all participants and all good luck for the next time.
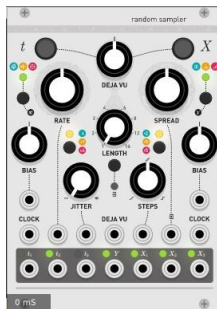

**VCV Rack - Día de los Muertos Vult Giveaway Contest**

Leonardo Laguna Ruiz, the developer of the **Vult modules**, and Omri Cohen are hosting another **giveaway contest** on the occasion of the upcoming **Día de los Muertos**, the Day of the Dead. Although it's actually **two contests**. **If you don't own the commercial modules from Vult** yet, you can win both packages - Premium & Compacts. The patch to be created may only

contain the free modules from Vult, as well as the Core Audio module and a reverb (no delay and no midi). If you want, you can also use additional modules of JW Modules.
For owners of the commercial modules, the price is the integration of their name or logo into Vult's 3 HP Blank module, so that it can be displayed in the scope - just like the Vult logo already is. In this case, all Vult modules may be used, but otherwise the conditions are the same.
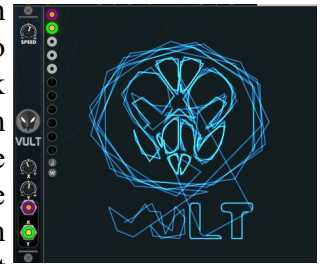

The theme of the patch is supposed to be creepy and unsettling **and the video has to be uploaded to Youtube by 31. 10. 2018 and a link to this video has to be sent to:** vultgiveaway@gmail.com Afterwards there will be a vote in the official VCV Rack Facebook Group until 2. 11. 2018. More information at **https://youtu.be/Ndgluk_yqb4**
