NEWS of the RACK VCV

#8 - Week 33/2019

Editorial

Hello everyone in Rack Land,

With this issue, I introduce a new section in the News of the Rack „Patches & Presets". I use files from Patchstorage, as well as facebook and from the forum. Also strip presets will be there and I attach great importance to the fact that all files may be freely distributed. Personally, I think it would be great if patches were further developed or alienated by different people and then published as a joint work - in the spirit of Musical Pals. I do not see the possibilities of musical cooperation being exhausted here. Maybe there is also a possibility of a joint live patching and online music making. Music overcomes all boundaries, this is not a new thought. But I dream of music, which is generated simultaneously in different corners of our world and merges into a synthesis of the arts - real world music. This is of course still a dream of the future, but it started already...

And now to the news.

Developer News and other News

VCV now accepts Google Pay, Apple Pay as well as credit cards, PayPal, and Bitcoin for purchases via the Plugin Manager.

Bogaudio has reworked its modules and is now at version **1.1.22.** In the Sample & Hold module S & H it is now possible to select the noise type and the voltage range in the context menu.
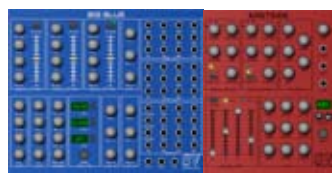

Lomas Modules has released version **1.0.2** of its modules.

Pyer, known for his great designs for Geodesics, repelzen and Stellare (just to name a few) has released a new **t-shirt design** on spreadshirt.

New Modules

Again, we are looking forward to a new developer.

But „new" is relative, because behind **SV Modular** is Jerry Sievert, known for his DrumKit, SynthKit and Charred Dessert modules. The **Synthetic** line is paid and can be purchased through the Plugin Manager for $ 10. Synthtic consists of the modules **Big Blue**, an 8-voice semi-modular synthesizer and **Eastside**, a 4-voice East Coast style synthesizer.

Frozen Wasteland released with version **1.8.1** another expander. This time for his two BPM LFOs. **PhaseX** supplements these by up to 12 different phase outputs.

Challenges & Collaborations

Very Cool Patch Challenge

Edition 37 of the **Very Cool Patch Challenge** is something special once again. This time, a random patch will be created with the module **WhatTheRack** by **korfuri**. 3 modules may still be added. Entries can be submitted by **August 19** and will be compiled into a playlist. A new challenge starts the next day.

In **Edition 36** of the **Very Cool Patch Challenge**, the module to be used was **re-burst** from **repelzen**. The contributions are summarized as always in a playlist.

Anyone interested in playing "musical pals"?
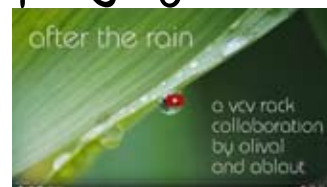

Unfortunately, the first attempt of a **musical chain letter** was not very successful, it now looks as if the new version is well received. The principle is simple: a person creates a voice from scratch and then sends the file to the other friend. The other friend creates a new voice and sends the file back etc etc, until you have a nice generative patch!
First results are already heard in the forum.
