Hello everyone in Rack Land,

the month is over and News of the Rack monthly, the new video edition of the News of the Rack has been released. I noticed that things in VCV-Rack are developing so fast that some news are outdated at the end of the month. I also planned to create an extra section for your music, but that's going to be too much. I probably underestimated your creativity. Instead there will be a playlist every week with your videos from the facebook group and the forum. If you do not want this, please let me know.

And now to the news.

Developer News and other News
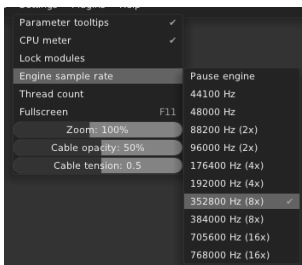

Also this week there is a small preview of **VCV-Rack version 1.0**. According to Andrew Belt up to **16x oversampling** is supported.

https://www.facebook.com/vcvrack/posts/2097308030357903

As a result of a **survey** in the facebook group and in the forum, VCV-Rack version 1.0 will **not support AVX**, as about 15% of users use processors built before 2011.

Just released **Impromptu Modular** version 0.6.13 with the Sequencer Foundry, already comes with version **0.6.14** a very important update. Among other things, Clocked does not skip the first steps in a sequential switch anymore.

https://github.com/MarcBoule/ImpromptuModular
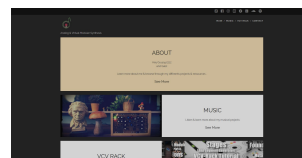

Omri Cohen has a new **website** for his music and videos. www.omricohen-music.com
New Modules

Also this week we welcome again a **new developer** in the Plugin Manager.

**Coirt/Bark** has released an **LFO** and a **Logic module** in version **0.6.3**.
https://github.com/Coirt/Bark

Geodesics has released version **0.6.5** and with it the thermodynamic microstate Sequencer **Entropia**.
https://www.pyer.be/download.html

Vult has released with version **0.6.22 Leakage**, a voltage processor that basically represents a row of the module Flux with additions.
